### **DETAILED ACTION**

#### ***Allowable Subject Matter***

Claims 11 and 14 are allowed.

1. Regarding claim 11, the closest prior art is Dai (US Patent Application No. 20030221612), which discloses an apparatus for holding a substrate with its front surface facing downward; and an attraction head provided with an attraction seal for attracting and holding the substrate supported by the substrate holding section while sealing a peripheral portion of the back surface of the substrate in a ring; a plurality of pressing mechanisms, disposed at locations along the circumferential direction of the substrate holding section, for contacting a peripheral portion of the front surface of the substrate.
2. Dai fails to teach a movable claw supported vertically pivotably by a pivot shaft and disposed along the diametral direction of the substrate holding section, said claw being biased downwardly by an elastic body on the outer side of the pivot shaft, and making contact with a peripheral portion of the front surface of the substrate on the inner side of the pivot shaft.
3. Claim 14 is allowable as being dependent on an allowable base claim.
